PROFILE

I am a resourceful pharmacoepidemiologist with over 4 years of experience. I am a pharmacist by training and currently completing my master's degree in epidemiology. I have worked across several therapeutic areas including oncology, dermatology, infectious diseases and vaccine safety. I have prolific experience in leveraging real-world databases and applying statistical analyses for decision-making. I have contributed to literature search and reviews, and manuscripts drafting on several instances.

PROFESSIONAL EXPERIENCE

Dec. 2025 - Jun. 2026 Angers & Rennes, France	Pharmacoepidemiologist - EHESP/UMR Arènes/POPS - Conducted large-scale secondary data analyses using the SNDS health data warehouse to support real-world epidemiological studies and safety signal evaluation - Contributed to data strategy and scientific leadership of large-scale pharmacoepidemiological projects, ensuring scientific quality and methodological rigour across study deliverables - Designed study protocols and analytical methodologies for population-level health data, including statistical analysis plans (SAP) in compliance with regulatory standards - Performed statistical analyses on approximately 9M patients to support data-driven decisionmaking - Ensured data quality control (QC) and reproducibility across complex datasets - Collaborated with cross-functional and international teams spanning medical affairs, regulatory affairs, and pharmacovigilance to support study operations and execution - Contributed to scientific deliverables including publications, presentations, and study reports delivered to stakeholders
Mar. 2025 - Jul. 2025 LIMOGES, France	Pharmacoepidemiologist — Therapeutic Adherence in Transplant Patients Research Internship - Limoges University Hospital, Pharmacy & Biostatistics - Conducted literature review and statistical analysis on patient datasets - Ensured data quality and contributed to structured data analysis workflows - Supported study execution and reporting - Contributed to study execution and final scientific report delivered to stakeholders
Aug. 2022 - Feb. 2024 Cotonou, Bénin	Pharmacoepidemiologist – Hospital Setting - University Hospital (Dermatology & Mycology) - Designed and conducted epidemiological studies using clinical and secondary data - Applied statistical methodologies for safety evaluation and risk factor identification - Produced scientific deliverables (study reports, written syntheses) - Ensured compliance with study protocols and standard operating procedures - Coordinated activities within multidisciplinary teams (physicians, pharmacists, biostatisticians) - Contributed to study execution in a clinical research environment
Apr. 2022 - Aug. 2024 Cotonou, Bénin	Assistant Pharmacist - Community Pharmacy Val - Managed wholesale drug orders of 5M+ FCFA per decade, overseeing supply chain and inventory in a resource-limited setting - Led ISO certification process by implementing regulatory documentation and quality/traceability standards across pharmacy operations - Counselled high-volume patient flow on therapeutic adherence for chronic conditions and organized group patient education workshops - Completed adverse drug reaction (ADR) declaration forms and contributed to post-marketing safety surveillance

SCIENCE COMMUNICATION

- Dissemination of scientific knowledge to the public through online platforms
- 5 oral presentations at conferences
- 2 poster presentations at conference
- Epidemiological, clinical and mycological profile of Onychomycosis in a hospital setting in Benin. Dermatol Res Pract. 2024 Oct 12;2024:1056753. doi: 10.1155/2024/1056753.

EDUCATION

2017 - 2024	Doctor of Pharmacy (PharmD)
Cotonou, Bénin	University of Abomey Calavi
2024 - 2026	Master's degree in Epidemiology
Limoges, France	University of Limoges

COURSES AND CERTIFICATIONS

- SNDS/PMSI : SNIIRAM Architecture & Governance (CNAM)** - 4-10 INSTITUTE - Dec. 2025
- SNDS: DCIR & Advanced Data Linkage (CNAM)** - 4-10 INSTITUTE - Jan. 2026

SKILLS

study design and execution	cross-functional teams	scientific leadership
feasibility assessment	analytical methodologies	stakeholders
Real World Evidence (RWE)	Entrepreneurial mindset	Project Coordination
SNDS / Health Data Analysis	consulting environment	SAS & R

LANGUAGES

English Professional proficiency	French Native
